

A different kind of care for depression

Safe, non-sedating and
designed to fit with your life.

Developed with purpose.
Anchored in science.

TREXAVIVE

Care that works in the real world.

WHAT IS TREXAVIVE?

TREXAVIVE is a once-delivered treatment designed for people living with depression or trauma-related conditions who need a new kind of solution.

It's not a daily medication

It doesn't cause sedation or dissociation

It's delivered via a small injection under the skin

HOW IT WORKS

In simple terms:

TREXAVIVE targets key brain receptors involved in mood, stress, and balance — without altering your consciousness.

No hospital stay

No daily pills

No need to take time off work or isolate yourself

Reported effects may last up to 12 months

If you've tried other treatments and feel stuck, you're not alone.

TREXAVIVE is used under specialist supervision and may be suitable if:

- » Your current treatments aren't helping enough
- » You want something that fits into your lifestyle
- » You're seeking long-term relief without sedation or side effects

Ask your doctor if TREXAVIVE might be an option. Visit trexavive.com/patients to learn more.
